

SOFTWARE DEVELOPMENT
BULLETIN NO. 9
MAY 26, 1983

TO: Distribution
SUBJECT: ZAX UPLOADER

A generalized ZAX uploader ("upzax") has been installed on both VAX 1 and VAX 2.

It can upload either from the user memory (including cartridges) or from the emulated memory, depending on the ZAX memory setting.

The uploaded data are stored in an INTEL hexfile, which can be directly downloaded if desired.

Please refer to the on-line manual pages for details on its usage.

Programmer: Chan Min

DISTRIBUTION
