1.   The syntax of UPGDT has been changed as follows:

```
old  :   upgdt [-cs] [<picture_name>]
new  :   upgdt [-cs]  <outfile>
```

This change will prevent the user from accidentally losing the old contents of 'a.up', which is the default output file created by UPGDT.

2.   The grom character menu and the color palette have been reorganized in such a way that similar symbols or colors are found in closer proximity.
