

TO: Distribution

SUBJECT: UNIX-TSX Virtual Terminal Connection

There is now a virtual terminal program (called mcu) on vax1 and vax2 that allows ascii file transfers between UNIX and TSX. There are two programs (catch and toss) installed on the TSX systems that are used when transferring files. Manual pages for all three programs are on-line on both vax's.

Commands:

mcu	connects you to a remote machine
catch	unix to tsx file transfer
toss	tsx to unix file transfer

Machine Class Numbers: see Tom O'Brien or Harold Matlock

Programmers: Ray Roux, Dave Milton, TSX help from Steve Field
