

SOFTWARE DEVELOPMENT
BULLETIN NO. 18
OCTOBER 24, 1983

TO: Distribution
SUBJECT: System Level of TSX

All TSX machines should be running under TSX+3.02.

This version has been modified to correct several errors in TSX+3.01 that was installed earlier this year. As machines went up and down and with fluctuations in staff, some machines had the old version re-installed or never got the new release.

Please look at the version your machine is running and if it is not 3.02 then let us know and we will install the newer one.

Programmer: Steven Field X6833 *SF*
