

SOFTWARE DEVELOPMENT  
BULLETIN NO. 12  
JUNE 21, 1983

TO: Distribution  
SUBJECT: DR. COLOR GOES TO UNIX

A UNIX version of Dr. Color has been written and installed on UNIX machines. Functionally it is identical to the original one, and its load/save procedures are very similar to the ones of TSX Dr. Color.

For the time being, both Mr. Color and Dr. Color will coexist on both UNIX machines. Note that they share grl, the assembly code generator, and their output files are interchangeable.

More details can be obtained by the following 'man' commands.

man drload  
man drsave  
man grl

Prgrammer: Chan Min, William Taylor
