

SYSTEM SOFTWARE
BULLETIN NO. 35
MARCH 1, 1983

TO: Distribution
SUBJECT: NEW CONFIGURATION FOR HPLINK

HPLink, which was running on the system console of TSX3, has been moved to line 6 under that systems upgrade. The default target surface for data transfers is now DP6: A terminal in the corner office has been provided.

The software now has 2 cosmetic changes. First a message as follows:

WARNING! Do NOT hit any keys. Use <ESC> to terminate.

and second, HPLink will not run on the console or a TSX virtual line.

Programmer: Steve Field
